

TIKILIVE WHITE-LABEL STB

By leveraging the power and connectivity of the Internet an IPTV solution reduces the costs associated with delivering content to your customers TVs. Featuring Live TV support over RTMP, HTTP, UDP, TCP protocols offers the flexibility to offer IPTV, OTT content and Internet TV. The TikiLIVE White-Label Set Top Box offers a fully customizable delivery platform. When combined with a turnkey TikiLIVE network an end to end software and hardware solution is created.

Through your admin dashboard manage all of your subscribers including the user's details, subscriptions (user rights), and billing. TikiLIVE Middleware features a robust Content Management System that tracks and reports all channels and VOD content for easy licensing and royalties for the content producers.

Set the prices and royalty fees for an infinite number of channel subscription packages quickly and easily from the simple-to-use interface.
